全自动对边验布机 Full Automatic Edge Cloth Inspecting Machine

EFC-260

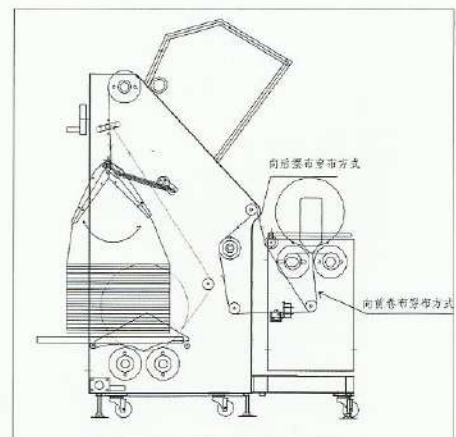

特点:

- 该机配备有展布装置,可使皱折布料变为平坦,并卷折整齐。
- 电子自动对边系统,可最大限度保证布料卷圆后布边整齐一致,包装美观,使用方便。
- 采用变频控制马达正逆转速,检验布速度每分钟从0-70码可调。
- 配有数显计米器,针对不同布料(针织、梭织布)可配备两种不同的安装方式,精确显示的检测布料的码数。
- 针对不同布料而设计的自动松布装置,无不自动停机,使布料在无张力的状态下检验或记码。

FEATURES:

- The machine is equipped with cloth spreading device, so as to spread the wrinkled cloth smooth and fold them neatly.
- Electronic auto edge alignment systems can fully ensure the good roll edge after rewinded, which can be packed beautifully and used conveniently.
- It used frequency converter to control motor for forward and backward rotating, which can adjust the speed to inspect the cloth from 0 to 70 yard every minute.
- It has the digital display meter counter. Two installation methods can be selected according to different cloths (knitting or woven cloths), so as to display precisely the yards of the inspected cloths.
- The automatic cloth loosening device designed for various cloths will shutdown automatically when there is no cloth, so that the cloth will be inspected or measured without tension.
